DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4, 6-12, and 14 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed because of the inclusion of previously objected to claim 5, which states:

the synchronizing step comprises:

transmitting a data packet having a header and data associated with the configuration information from the first agent module to the second agent module;

acknowledging the data transmitting step by returning an answer packet from the second agent module to the first agent module;

receiving the answer packet at the first agent module; and

repeating the transmitting, the replying and the receiving steps until all of the configuration information is completely transferred;

wherein the header in the data packet comprises a field indicative of a packet transmission type;

wherein the answer packet is the header having the field indicative of packet acknowledgement type.

Art Unit: 2114

When taken within the scope of the remainder of the limitations of the claim, the novelty of the invention is apparent.

Claims 2-4 and 6-7 are allowed based upon their dependence to claim 1.

Claim 8 is allowed because of the inclusion of previously objected to claim 13, which states:

the synchronizing step comprises:

transmitting a data packet having a header and data associated with the configuration information from the first agent module to the second agent module;

acknowledging the data transmitting step by returning an answer packet from the second agent module to the first agent module;

receiving the answer packet at the first agent module; and

repeating the transmitting, the replying and the receiving steps until all of the configuration information is completely transferred;

wherein the header in the data packet comprises a field indicative of a packet transmission type;

wherein the answer packet is the header having the field indicative of packet acknowledgement type.

When taken within the scope of the remainder of the limitations of the claim, the novelty of the invention is apparent.

Claims 9-12 and 14 are allowed based upon their dependence to claim 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
